DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Species I, claims 1-11, 44, is drawn to a species of an optical waveguide modulator where a Mach-Zehnder interferometer including a reinforcing capillary in the form of a cylinder.

Species II, claims 1, 2, 12-22, is drawn to a species of an optical waveguide modulator where a reinforcing capillary wherein the terminal surface of the reinforcing capillary formed from the light-transmittable material is provided with a surface portion, in which the monitoring light is reflected, and a non-monitoring surface portion.

Species III, claims 1, 23-43, is drawn to an optical waveguide modulator where a Mach-Zehnder interferometer with a reinforcing capillary wherein the optical waveguide of the optical waveguide element has a monitoring light-outputting optical waveguide portion connected to the waveguide-connecting portion, in addition to the output light-outputting optical waveguide portion, to thereby output the monitoring light through the output end of the monitoring light-outputting optical waveguide portion.

Applicant is required, in reply to this action, to elect a single species to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An

Art Unit: 2883

argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

The following claim(s) are generic: 1.

2. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The reinforcing capillary has multiple applications.

3. A telephone call was made to Attorney Prout on March 2, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
